REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests a waveform equalization apparatus comprising: a plurality of transversal filters for performing filtering processes for waveform equalization on the digital input signal; plural selectors for selecting a connection of lines which interconnect of the first or second input terminal, the plural transversal filters, and the first or second output terminal; and a filter construction control signal generator for generating a filter construction control signal which controls the plural selectors to control the filter construction such that the whole apparatus becomes a real component filter when the digital input signal is a signal having only a real component, and becomes a complex filter when the digital input signal is a signal having both a real component and an imaginary component as recited in claim 1; first to fourth transversal filter units performing filtering processes for waveform equalization; a delay means for delaying an input signal to output a delayed signal; and first and second tap coefficient control means for controlling tap coefficients of the first to fourth TF units as recited in claim 6; a structure of four transceiver filter and six selectors, and two tap coefficient control means for processing a waveform equalization as recited in claims 10, 14, and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kurokami (U.S. Pat. 5,285,475) discloses decision feedback equalizer.

Mizoguchi (U.S. Pat. 5,321,723) discloses automatic equalizer.

Ando (U.S. 2001/0026578) A1 disclose code division multiple access transmitter and receiver.
